

Prayer Times

Status Quo

1. We take times published by ISIJ Toronto and add a flat 4 minutes to account for our distance from the GTA. (**JCC+4**)
2. Occasional times published by IHS / Shk. Saleem Bhimji that do not agree with JCC+4 times.

Salaat Timings | ISIJ of Toronto

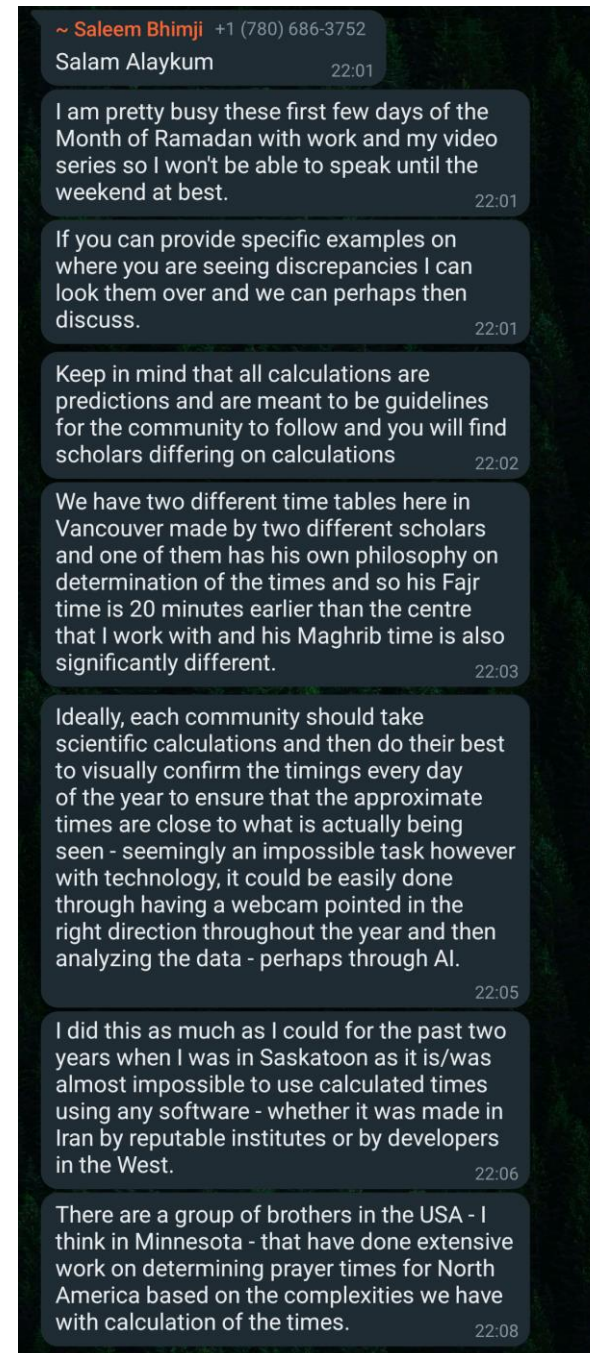

jaffari.org/resources/salaat-timings/

Important Notice

The community is advised to make adjustments to the timings by adding 14 minutes when in Windsor and subtracting 15 minutes when in Ottawa. As can be seen from [these tables](#) it is not possible to generally use the time table of one town and use in another town by applying a fixed time correction. This is because the sunrise and sunset times difference between towns that are on different latitude is not the same throughout the year.

The Issue (JCC)

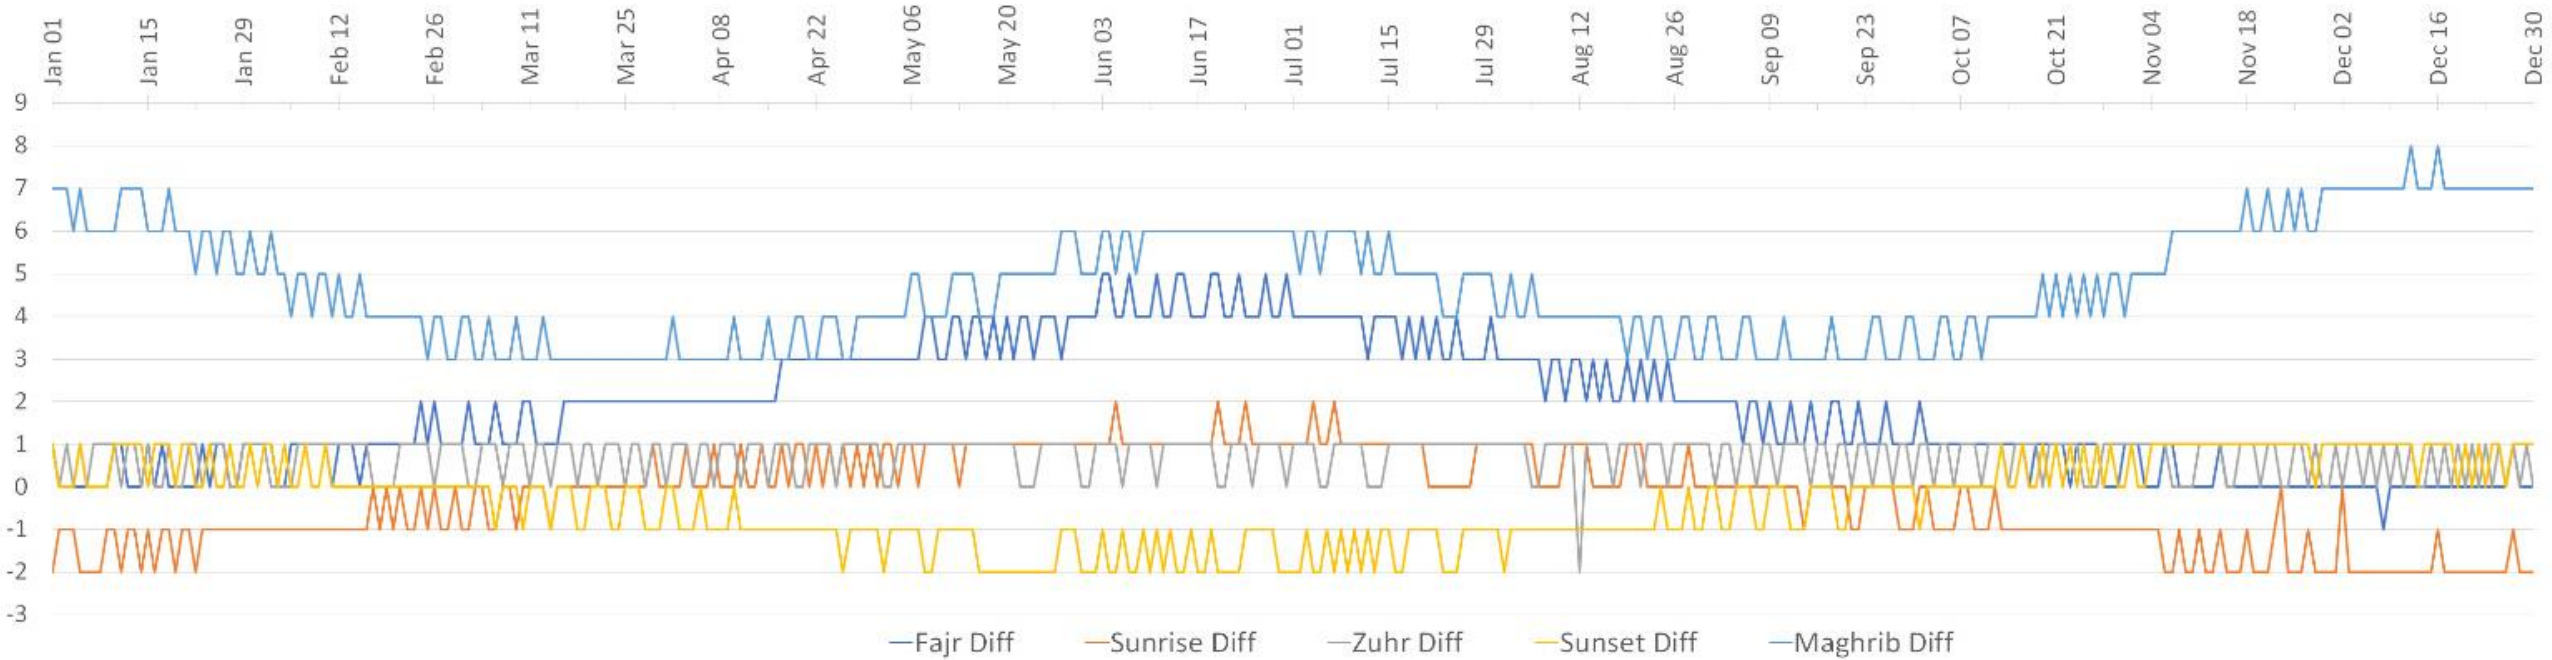

The Issue (IHS)

The Solution - Creating Dedicated Year-Round Times for KW

- There are two sets of solar angle conventions created based on Shia view.
- One is by the Leva Institute, Qom, and the other is by the University of Tehran.
- Conversed with Shk. Hasanain Kassamali and Maulana Rizvi, who both agreed Leva Institute can be followed and that the times created based on the Leva dataset and KW's coordinates should be good for us.
- Shk. Hasanain Kassamali stated this timesheet is good for publication, but we should remind people to observe precaution.

Difference of JCC+4 and New Times (New Time – JCC+4)

Difference of JCC+4 and New Times (New Time – JCC+4)

Date	Fajr Diff	Sunrise Diff	Zuhr Diff	Sunset Diff	Maghrib Diff
January 1	1	-2	1	1	7
April 1	2	0	1	0	4
July 1	4	1	1	-2	6
October 1	2	0	1	-1	3
